DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7-11, 18 and 35-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Splett et al '242.

Splett et al disclose obtaining location data comprising data samples on waveform 200 which represent different location points of heart tissue. The examiner is interpreting the variables V_0 - V_2 to comprise index values associated with the data points X_0 - X_2 .

One of ordinary skill in the art would have found it obvious to use first and second memory data locations because Splett et al teach an off-board memory unit 136 that could include RAM, ROM or both for storing both data,

programming instructions, and any other operation parameters that may be needed by the system.

Regarding claims 35-41 and 43, user-selectable tab activation, pane and background selection are well known computer window functions usable with the external programmer 20.

Regarding claim 42, the examiner is interpreting the time axis of Figs. 3 to 9 to provide the time stamp for the voltage amplitude data points.

Allowable Subject Matter

Claims 19-34 are allowed.

Claims 6 and 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
